		<i>Distinctive features of a study programme:</i>
		General Practice Nursing Program is characterized by the integration of theoretical and practical studies. During practical studies, real situations are simulated, which imitate patients and their care in a hospital environment, i.e. real medical environment. The simulation of care procedures enables to create various clinical situations in a student safe environment without any harm to the patient. Artificial patients and body parts, such as mannequins are used. Practical studies are carried out in small groups with a possibility to acquire practical skills not only in clinical simulation laboratories but also in real working environments: hospitals of various profiles, healthcare centres, communities and patient home environment. 50 % of studies is devoted to practical training. Students have a possibility to finish part of the studies abroad. Study programme is distinct for internationality and close cooperation relations with foreign partners.
		Access to professional activity or further study:
		<i>Access to professional activity:</i>
		The graduate is granted with a right to work independently or in the healthcare institutions of various healthcare levels that provide healthcare services for people of various age groups, disabled, families and community.
		<i>Access to further study:</i>
		Access to the second cycle studies upon meeting requirements set by the accepting higher education institution.
